

## Summary

---

This week we start to learn CSS, adding style to the webpage. CSS basically is for describe how the content should be rendered, it allows a browser engine to paint elements of the page with specific instruction. Developer tools build into the browsers also be introduced during the class. There are several other details on CSS covered in class listed here:

- Stylesheet
  - o Internal
  - o External
  - o In lines
- DOM
- Block/ Inline
  - o Block Elements
  - o Inline Elements
- CSS Element
  - o Fonts
  - o Colors
  - o Values & Units
    - Pixels
    - Percentages
    - Ems
  - o Backgrounds

## Question for Mid-term

---

How to apply font large size to <p class="large"> using CSS?

Correct:

```
p.class{  
    size: large;  
}
```

Option could have something include:

```
P.class{  
    font-size: large;  
}
```

## Surprise or confused topic

---

I am really curious on Box model; this is how we design and layout the element on a html page. Getting to know difference between Margin, Border, Padding is really important for me to format the page.
